Table of Contents

VOLUME 92, 1994 (Evoked Potentials)

MAIN ARTICLES

Neurological dysfunction in asymptomatic HIV-1 infected men: evidence from evoked potentials
V.J. Iragui, J. Kalmijn, L.J. Thal, I. Grant and The HNRC Group (USA) 1
Effects of chronic high serum levels of phenobarbital on evoked potentials in epileptic children
M. Brinciotti (Italy) 11
Click-evoked responses from the exposed intracranial portion of the eighth nerve during vestibular nerve section: bipolar and monopolar recordings
A.R. Møller, V. Colletti and F.G. Fiorino (USA, Italy) 17
Speech-evoked activity in primary auditory cortex: effects of voice onset time
M. Steinschneider, C.E. Schroeder, J.C. Arezzo and H.G. Vaughan, Jr. (USA) 30
Mapping P300 waves onto inhibition: Go/No-Go discrimination
L.E. Roberts, H. Rau, W. Lutzenberger and N. Birbaumer (Canada, Germany, Italy) 44
Characteristics of the background fields in multichannel-recorded magnetic field responses
S. Kuriki, F. Takeuchi and T. Kobayashi (Japan) 56
Contrast modulated steady-state visual evoked potentials (CMSS VEPs): recording evoked potentials and related single cell responses in area 17 of the cat
W. Spileers, H. Maes, L. Lagae and G.A. Orban (Belgium) 64
Pattern reversal evoked potentials: gender differences and age-related changes in amplitude and latency
R. Emmerson-Hanover, D.E. Shearer, D.J. Creel and R.E. Dustman (USA) 93
Differences in the pattern visual evoked potential between pregnant and non-pregnant women
M.S. Marsh and S. Smith (UK) 102
A comparison of different methods for estimating single-trial P300 latencies
F.T.Y. Smulders, J.L. Kenemans and A. Kok (The Netherlands) 107
Heritable features of the auditory oddball event-related potential: peaks, latencies, morphology and topography
S. O'Connor, S. Morzorati, J.C. Christian and T.-K. Li (USA) 115
Effects of aging on event-related brain potentials (ERPs) in a visual detection task
M. Kutas, V. Iragui and S.A. Hillyard (USA) 126
Mismatch negativity to changes in a continuous tone with regularly varying frequencies
E. Schröger, P. Paavilainen and R. Näätänen (Germany, Finland) 140
Effects of choice complexity on different subcomponents of the late positive complex of the event-related potential
M. Falkenstein, J. Hohnsbein and J. Hoormann (FRG) 148
Equivalent dipole parameter estimation using simulated annealing
J. Gerson, V.A. Cardenas and G. Fein (USA) 161
Long latency transient evoked potentials to rapid random stimulation: responses to single and multiple concurrent stimuli
M.J. Rowe, III and J. Varilone (USA) 175
Glossopharyngeal evoked potentials in normal subjects following mechanical stimulation of the anterior faucial pillar
M. Fujiu, J.R. Toleikis, J.A. Logemann and C.R. Larson (USA) 183
Recovery of hypoglycaemia-associated compromised cerebral function after a short interval of euglycaemia in insulin-dependent diabetic patients
T. Lingenfelser, U.W. Buettner, H. Uhl, W. Renn, M. Tobis, R. Teichmann, M. Eggstein and B. Jakober (Germany) 196
Evoked potentials recorded from the auditory cortex in man: evaluation and topography of the middle latency components
C. Liégeois-Chauvel, A. Musolino, J.M. Badier, P. Marquis and P. Chauvel (France) 204
Click-evoked responses from the cochlear nucleus: a study in human
A.R. Møller, P.J. Jannetta and H.D. Jho (USA) 215
Visual and somatosensory event-related brain potentials in autistic children and three different control groups
C. Kemner, M.N. Verbaten, J.M. Cuperus, G. Camfferman and H. Van Engeland (The Netherlands) 225
Dissociation of temporal and frontal components in the human auditory N1 wave: a scalp current density and dipole model analysis
M.H. Giard, F. Perrin, J.F. Echallier, M. Thévenet, J.C. Froment and J. Pernier (France) 238
P300 from a single auditory stimulus
J. Polich, S.E. Eischen and G.E. Collins (USA) 253
The magnetic counterpart of the contingent negative variation
T. Elbert, B. Rockstroh, S. Hampson, C. Pantev and M. Hoke (Germany) 262
Evoked potential findings in Behçet's disease. Brain-stem auditory, visual, and somatosensory evoked potentials in 44 patients
B. Stigsby, S. Bohlega, M.Z. Al-Kawi, A. Al-Dalaan and K. El-Ramahi (Saudi Arabia) 273
Subdural grid recordings of distributed neocortical networks involved with somatosensory discrimination
A. Gevins, B. Cutillo, J. Desmond, M. Ward, S. Bressler, N. Barbero and K. Laxer (USA) 282
SEP topographies elicited by innocuous and noxious sural nerve stimulation. I. Identification of stable periods and individual differences
R. Dowman (USA) 291

SEP topographies elicited by innocuous and noxious sural nerve stimulation. II. Effects of stimulus intensity on topographic pattern and amplitude
R. Dowman (USA) 303
Neural conduction velocity of the human auditory nerve: bipolar recordings from the exposed intracranial portion of the eighth nerve during vestibular nerve section
A.R. Møller, V. Colletti and F.G. Fiorino (USA, Italy) 316
Two-channel brain-stem frequency-following responses to pure tone and missing fundamental stimuli
G.C. Galbraith (USA) 321
Movement-related cortical potentials preceding sequential and goal-directed finger and arm movements in patients with cerebellar atrophy
K. Wessel, R. Verleger, D. Nazarenus, P. Vieregge and D. Kömpf (Germany) 331
Event-related potentials to faces: the effects of priming and recognition
S. Hertz, B. Porjesz, H. Begleiter and D. Chorlian (USA) 342
P3 latency jitter assessed using 2 techniques. I. Simulated data and surface recordings in normal subjects
A. Puce, S.F. Berkovic, P.J. Cadusch and P.F. Bladin (Australia) 352
SEP topographies elicited by innocuous and noxious sural nerve stimulation. III. Dipole source localization analysis
R. Dowman and T.M. Darcey (USA) 373
Risk for ABR abnormalities in the nursery
A. Salamy and L. Eldredge (USA) 392
Three-channel Lissajous' trajectory of the binaural interaction components in human auditory brain-stem evoked potentials
A. Polyakov and H. Pratt (Israel) 396
Objective detection of 40 Hz auditory evoked potentials: phase coherence vs. magnitude-squared coherence
R.A. Dobie and M.J. Wilson (USA) 405
Whole-head mapping of middle-latency auditory evoked magnetic fields
J.P. Mäkelä, M. Hämäläinen, R. Hari and L. McEvoy (Finland) 414
Reduction of visual P300 during transient global amnesia
H. Bokura, S. Yamaguchi, H. Tsuchiya, K. Yamashita and S. Kobayashi (Japan) 422
Chemo-somatosensory event-related potentials in response to repetitive painful chemical stimulation of the nasal mucosa
T. Hummel, M. Gruber, E. Pauli and G. Kobal (Germany) 426
Local estimate of surface Laplacian derivation on a realistically shaped scalp surface and its performance on noisy data
J. Le, V. Menon and A. Gevins (USA) 433
Mass-action view of single-cell responses to stimulation of the receptive field and/or beyond: exemplification with data from the rabbit primary visual cortex
U. Mitzdorf, B.-H. Li and E. Pöppel (FRG) 442
High-rate sequential sampling of auditory brain-stem and somatosensory evoked responses in hypoxia
S.-I. Kajimoto, H. Hosomi, H. Suwaki and K. Hosokawa (Japan) 456
Differential sensitivity to rotation measured on potentials evoked by electrical stimulation of the guinea-pig ear
R. Charlet de Sauvage, J.-P. Erre and J.-M. Aran (France) 462
Comparison of visual evoked potentials elicited by light-emitting diodes and TV monitor stimulation in patients with multiple sclerosis and potentially related conditions
T. Andersson and Å. Sidén (Sweden) 473
Use of pattern electroretinography to differentiate acute optic neuritis from acute anterior ischemic optic neuropathy
J. Froehlich and D.I. Kaufman (USA) 480
Covariability of visually evoked potentials and simple motor reaction times
R.C. Hartwell and J.D. Cowan (USA) 487
Somatosensory evoked potentials at rest and during movement in Parkinson's disease: evidence for a specific apomorphine effect on the frontal N30 wave
G. Cheron, T. Piette, A. Thiriaux, J. Jacquy and E. Godaux (Belgium) 491
The role of upper limb somatosensory evoked potentials in the management of cervical spondylotic myelopathy: preliminary data
D. Restuccia, V. Di Lazzaro, M. Valeriani, L. Aulisa, M. Galli, P. Tonali and F. Mauguière (Italy, France) 502
Comparison of somatosensory evoked fields to airpuff and electric stimuli
N. Forss, R. Salmelin and R. Hari (Finland) 510
The effects of stimulus rates upon median, ulnar and radial nerve somatosensory evoked potentials
M. Fujii, T. Yamada, M. Aihara, Y. Kokubun, Y. Noguchi, M. Matsubara and M.H. Yeh (USA) 518
Effect of manipulation and fractionated finger movements on subcortical sensory activity in man
V. Weerasinghe and M. Sedgwick (UK) 527
The auditory P50 response is normal in Alzheimer's disease when measured via a paired click paradigm
G. Fein, C. Biggins and C. Van Dyke (USA) 536
ERPs in schizophrenic patients during word recognition task and reaction times
S. Koyama, H. Hokama, M. Miyatani, C. Ogura, Y. Nageishi and M. Shimokochi (Japan) 546
P3 latency jitter assessed using 2 techniques. II. Surface and sphenoidal recordings in subjects with focal epilepsy
A. Puce, S.F. Berkovic, P.J. Cadusch and P.F. Bladin (Australia) 555

SHORT COMMUNICATIONS

Induced refractive errors and pattern electroretinograms and pattern visual evoked potentials: implications for clinical assessments
P.R. Bartel and A. Vos (South Africa) 78
Spinal and brain-stem SEPs and H reflex during enflurane anesthesia
N. Mavroudakis, A. Vandesteene, E. Brunko, M. Defevrimont and D. Zegers de Beyl (Belgium) 82
Intraoperative recording of parietal SEP can miss hemodynamic infarction during carotid endarterectomy: a case study
W.F. Haupt, H. Erasmi-Körber and H. Lanfermann (Germany) 86
Machine scoring of somatosensory evoked potentials
H. Pratt, N. Mittelman and A.B. Geva (Israel) 89
Color VEPs in Parkinson's disease
L. Barbato, S. Rinalduzzi, M. Laurenti, S. Ruggieri and N. Accornero (Italy) 169
Distributed current analyses of bi-hemispheric magnetic N1m responses to ipsi/contralateral monaural stimuli from a single subject
K.D. Singh, A.A. Ioannides, N. Gray, H. Kober, H. Pongratz, A. Daun, P. Grummich and J. Vieth (UK, Germany) 365
P300 from families
S.E. Eischen and J. Polich (USA) 369
A high-intensity, goggle-mounted flash stimulator for short-latency visual evoked potentials
H. Pratt, W.H. Martin, N. Bleich, M. Zaaroor and S.E. Schacham (Israel) 469
Prognostic value of frontal and parietal somatosensory evoked potentials in severe head injury: a long-term follow-up study
E. Gütling, A. Gonser, H.-G. Imhof and T. Landis (Switzerland) 568

BOOK REVIEWS

Event-related potentials: basic issues and applications
edited by J.W. Rohrbaugh, R. Parasuraman and R. Johnson, Jr. 173
Neurological and neurosurgical intensive care
edited by A.H. Ropper 173
Evoked potentials in clinical testing (clinical and neurosurgery monographs), 2nd Edition
edited by A.M. Halliday 174
